Summary of Search for San Ramon

I have lived in San Ramon since 2004 and the city is made up of mostly single family housing developments with a small business community. I first decided to head to the city and county libraries to look up the Sanborn Maps for San Ramon. What I found was that since the city was not incorporated until 1984 they didn't have Sanborn Maps of San Ramon. So then I decided to perform a visual survey of the area and observed what appeared to be late 1980's and 1990's tilt-up buildings throughout most of the business areas. I did not observe any other concrete buildings.
